

## Union City Pioneer Genealogical Database

The Union City Pioneer Genealogical Database is a single GEDCOM file with 340 early residents of Union City (both Alvarado and Decoto). GEDCOM is a standard genealogical database file and it should be readable by most genealogical programs on the market. The database was created with GenealogyJ (GenJ), an Open Source Java-based program that is free and runs on most operating systems, including Windows, Linux, and MacOS. GenJ can be found at the following web address:

<http://genj.sourceforge.net/>
